Global Healing dares to change the world through a combination of technical expertise, materials and supplies, coupled with generosity and compassion.

In addition to providing crucial support to medical colleagues in other parts of the world, Global Healing’s activities have opened my eyes to a world of possibilities for helping others.

I am proud of and it is a fortune to be a part of history which Global Healing is making for our planet last 20 years. This organization changed forever the healthcare system for several countries on different continents.

-Christoper Gresens, MD
Global Healing Volunteer
Sacramento, CA

The collaboration between our hospital and GH is based on the hope to strengthen acute care for patients at the National Hospital of Pediatrics. I believe that with our endless effort, together with Global Healing’s great support, NHP will be able to achieve the goal of delivering the best care to Vietnamese children in the very near future.

-Le Thanh Hai, MD
Director, the National Hospital of Pediatrics
Hanoi, Vietnam

I am proud of and it is a fortune to be a part of history which Global Healing is making for our planet last 20 years. This organization changed forever the healthcare system for several countries on different continents.

-Irakli Metreveli, MD
Board of Founders, Jo Ann Medical Center
Tbilisi, Georgia

VOLUNTEER
To learn more about volunteer opportunities in Honduras and Vietnam, contact our Program Manager Sarah Fernández at sarah@globalhealing.org.

To learn more about volunteer opportunities in Haiti and Georgia, contact our Program Manager Erin Coyne at erin@globalhealing.org.

DONATE
All contributions are tax-deductible and deeply appreciated. You can visit www.globalhealing.org/donate to donate online or you can send donation checks directly to:

Global Healing
2140 Shattuck Avenue Suite 203
Berkeley, CA 94704

Please indicate in the subject line if you would like your contribution to benefit a specific program site.

Donations of medical equipment and supplies can be coordinated through contact@globalhealing.org.

**OUR MISSION**

We aim for sustainable development of healthcare services to improve access to care for people in developing countries. We have over twenty years' experience developing successful medical programs in the fields of pediatrics, cardiac surgery, blood transfusion and laboratory medicine in Georgia, Armenia, Honduras, Dominica, Moldova, Haiti, Ukraine, and Vietnam.

**OUR MODEL**

We work with all sectors of society: private businesses in the United States and abroad, local government, healthcare providers, educators, and private citizens to facilitate sustainable improvements in access to life-saving healthcare in the countries where we work. The volunteers who help to develop our programs and provide training and technical support to our partners, and the donations that provide needed medical equipment and operational funds, are the lifeblood of our work. We select our program activities based on medical need, public health impact, and the potential to create enduring improvements in access to healthcare.

---

**Global Healing established the Roatán Volunteer Pediatric Clinic (RVPC) in 2003 as a joint project with Public Hospital Roatán to provide much-needed medical care to children on the island. We are currently pursuing new initiatives in collaboration with the University of California, San Francisco, University of California, Berkeley, and Medic Mobile to improve newborn and child health on the island.**

**Hôpital Universitaire de Mirebalais Blood Bank**

Mirebalais, HAITI

**We ensure the availability of quality medical care for the children of Roatán.**

Global Healing is strengthening the ability of emergency department and ICU physicians and nurses to deliver care to their patients.

We are helping the NHP to develop and implement standardized practices that will enable medical staff to recognize early onset of illnesses and provide children with the appropriate life-saving care. The ultimate goal of the program is to establish a nationally replicable model for regional pediatric hospitals outside of Hanoi.

---

**National Blood Safety Reform**

REPUBLIC OF GEORGIA

**We shape national blood banking policy and practices enabling life-saving blood transfusions.**

We are working with the Georgian National Center for Disease Control to help make vital improvements to the country's blood banking systems. Our volunteers are conducting webinars and hands-on trainings for blood bank personnel throughout the country, preparing them for the successful implementation of these reforms.

---

**We are enabling the teaching hospital opened by Partners in Health to produce its own sustainable supply of life-saving blood products.**

Thanks to training we have provided, the blood bank is now able to support critical services at the hospital including obstetrics, surgery, post-operative care and pediatrics. In order to develop a self-sufficient blood transfusion service, we continue to provide training to improve laboratory quality and build the skills of the blood bank staff.
